| Overview of Guidelines for General Public - and Employers | General public and employers take extreme precautions  
Face coverings worn in public settings where other social distancing measures are difficult to maintain  
Follow strict hygiene standards, including:  
- Wash hands frequently with soap and water for at least 20 seconds  
- Use hand sanitizer frequently  
- Avoid touching your face  
- Cover coughs or sneezes (e.g. into a tissue, sleeve, or elbow; not hands)  
- Regularly clean high-touch surfaces (e.g. door handles, counters, light switches, remote controls, restroom surfaces)  
- Follow any other standards promulgated by the Centers for Disease Control and Prevention (CDC), the Utah Department of Health, and local health department  
- Do not shake hands  
- In-person interactions limited to individual households; Interactions in groups of 10 or fewer  
- Increase virtual interactions  
- Leave home infrequently; stay 6 feet away from others when outside the home  
- Regularly disinfect high-touch areas (e.g. door handles, buttons/switches, countertops, handrails, shopping carts, check-out counters, restroom surfaces)  
- Give sick family members their own room if possible and keep the door closed  
- Have only one family member care for the sick individual  
- Schools closed  
- Employers and volunteers of businesses operate remotely, unless not possible  
- Employers evaluate workforce strategy, concerns, and enact strategies to minimize economic impact | General public and employers take extreme precautions

High Risk | Moderate Risk | Low Risk | New Normal Risk
--- | --- | --- | ---
- Encourage high-contact businesses not to operate
- Symptom checking in public and business interactions (checklist or verbal symptom checking)
- Design spaces to maintain 6-foot distance between individuals
- Limit travel to essential travel only: quarantine 14 days upon return from high-risk areas (this quarantine protocol does not apply to an individual who travels out of state pursuant to the individual’s regular and ordinary duties as an employee of a transportation business or entity)

Employers evaluate workforce strategy, concerns, and enact strategies to minimize economic impact
- High-contact businesses can operate under strict protocols
- Restaurants are open for dine-in services with strict requirements
- Symptom checking in public and business interactions (checklist or verbal symptom checking)
- Design spaces to maintain 6-foot distance between individuals
- Limit out-of-state travel, quarantine 14 days upon return from high-risk areas (this quarantine protocol does not apply to an individual who travels out of state pursuant to the individual’s regular and ordinary duties as an employee of a transportation business or entity)

Symptom checking in public and business interactions (checklist or verbal symptom checking)
- Design spaces to maintain 6-foot distance between individuals
- Limit out-of-state travel, quarantine 14 days upon return from high-risk areas (this quarantine protocol does not apply to an individual who travels out of state pursuant to the individual’s regular and ordinary duties as an employee of a transportation business or entity)

2 Essential travel means to: safely relocate by an individual whose home or residence is unsafe, including individuals who have suffered or are at risk of domestic violence, or for whom the safety, sanitation or essential operations of the home or residence cannot be maintained; care for a family member or friend in the same household or another household, including transporting family members or friends; transport a child according to existing parenting time schedules or other visitation schedules pertaining to a child in need of protective services; care for pets, including travel to a veterinarian; seek emergency services; obtain medications and medical services; donate blood; obtain food, including delivery or carry-out services, beverages (alcoholic and non-alcoholic), and other grocery items, gasoline, supplies required to work from home, and products needed to maintain the safety, sanitation, and essential operation of homes and residences, businesses, and personally owned vehicles, including automobiles and bicycles; perform work if you cannot telework; transport/deliver essential goods; engage in recreational and outdoor activities; laundromats and dry cleaners; return to a home or place of residence

Tiered Guidelines for High-Risk Individuals

High-risk individuals are defined as people 65 years and older, people who live in a nursing home or long-term care facility, people of all ages with underlying medical conditions, including lung disease or moderate to severe asthma, people who have serious heart conditions, people who are immunocompromised (many conditions can cause a person to be immunocompromised, including cancer treatment, smoking, bone marrow or organ transplantation, immune deficiencies, poorly controlled HIV or AIDS, and prolonged use of corticosteroids and other immune weakening medications), people with severe obesity, diabetes, chronic kidney disease undergoing dialysis, or liver disease.

**Households with High-Risk Individuals**

- For those living with a high-risk individual, household members should conduct themselves as if they are a significant risk to the high-risk individual
- Wash hands before interacting with high-risk household members, including before feeding or caring for the person
- If possible, provide a protected space for high-risk household members, and ensure all utensils and surfaces are cleaned regularly
- High-risk populations should take extra precaution to avoid close contact with multiple people, including having the same caretakers whenever possible
- Those who are, or work with, vulnerable populations should undergo daily screening/symptom monitoring and should be tested if they develop COVID-19 symptoms
- Consider providing additional protections or more intensive care for high-risk household member
- Additional CDC guidance for high-risk populations can be found [here](https://www.cdc.gov/coronavirus/2019-ncov/need-extra-precautions/what-you-can-do.html)

---

\(^5\) Symptoms include fever of 100.4 degrees Fahrenheit or above, cough, trouble breathing, sore throat, sudden change in taste or smell, muscle aches or pains  
Face coverings are extremely important in the retail setting, as customers are passing one another with high frequency.

### Convenience Stores
- Dine-in services are opened, with tables arranged so there is appropriate distance between diners. Increased hygiene practices for customers and staff.
- Follow all employer guidelines outlined on page 7.
- Dine-in services, including buffets and bars, may be open under the following requirements outlined in the appendix on page 16.
- For takeout services:
  - Symptom checking of employees.
  - Staff wear face coverings.
  - Staff must sanitize hands between handling payment options and food/containers.
- When delivering food, drivers use hand sanitizer before passing delivery to customers and use disposable containers/packaging that do not need to be returned.
- Employers provide personal protection equipment such as face coverings, hair nets, gloves, overalls.
- When delivering food, drivers use hand sanitizer before passing delivery to customers and use disposable containers/packaging that do not need to be returned.
- Customers voluntarily provide contact information to assist with contact tracing efforts.

### Restaurants, Food Service Establishments, Bars, Food Trucks, Convenience Stores
- Takeout, curbside pickup or delivery only. Extreme caution taken in food preparation. Physical distancing maintained. Contactless payment encouraged. Create safe environment for staff.
- Follow all employer guidelines outlined on page 7.
- Takeout only. This includes delivery, curbside pickup, third-party delivery (e.g., DoorDash, Grubhub, Uber Eats).
- Symptom checking of employees.
- Stagger workstations so workers can maintain a 6-foot distance and do not face one another.
- Encourage contactless payment; if not possible, disinfect transaction terminal between customers.
- Staff must sanitize hands between handling payment options and food/containers.
- When delivering food, drivers use hand sanitizer before passing delivery to customers and use disposable containers/packaging that do not need to be returned.
- Employers provide personal protection equipment such as face coverings, hair nets, gloves, overalls.
- Customers voluntarily provide contact information to assist with contact tracing efforts.

### Retail, including Grocery Stores, Pharmacy, Convenience Stores
- Essential retail (e.g., grocery, hardware, etc.) create a safe environment for customers and staff with frequent reminders on distancing and hygiene. Monitor patrons and employees for symptoms. Customers and employees wear face coverings.
  - Follow all employer guidelines outlined on page 7.
  - Both customers and employees wear face coverings.
  - Maintain signage to remind and help individuals stand at least 6 feet apart, including outside when in line, and in store check-out lines.
  - Assign an employee to disinfect carts and baskets after each use.
- Retail establishments exercise discretion, establishing principles for safe environment and public trust. Monitor employees for symptoms and encourage face coverings for any interactions taking place within 6 feet.
  - Follow all employer guidelines outlined on page 7.
  - Face coverings are worn for interactions that take place within a 6-foot distance.
  - Maintain signage to remind and help individuals stand at least 6 feet apart, including in store check-out lines.
  - Assign an employee to disinfect carts and baskets after each use.

Page 10 | Version 4.0
## Phased Guidelines for the General Public and Businesses to Maximize Public Health and Economic Reactivation

### High Risk
- Set an established window time for high-risk groups to come in without pressure from crowds and/or separate entrances and queues
- Limit the number of people in a confined area to enable adequate distancing at all times
- Maintain signage to remind and help individuals stand at least 6 feet apart when in common areas or while visiting exhibits (e.g. museums, zoos, aquariums, aviaries, botanical gardens)
- Congregating at any point is not allowed
- Encourage contactless payment; disinfect between transactions and comply with other retail recommendations
- Participants (e.g., players, performers, actors) in events should have their symptoms checked
- Electronic tickets and playbills encouraged in place of paper

### Moderate Risk
- Set an established window time for high-risk groups to come in without pressure from crowds and/or separate entrances and queues
- Limit the number of people in a confined area to enable adequate distancing at all times
- Maintain signage to remind and help individuals stand at least 6 feet apart when in common areas or while visiting exhibits (e.g. museums, zoos, aquariums, aviaries, botanical gardens)
- Congregating at any point is not allowed
- Encourage contactless payment; disinfect between transactions at facility stores/gift shops and comply with other retail recommendations
- Participants (e.g., players, performers, actors) in events should have their symptoms checked
- Electronic tickets and playbills encouraged in place of paper

**Concessions:**
- Serving and seating protocols consistent with restaurant guidance
- Maintain 6-foot distancing for all lines
- Encourage contactless payment
- To the extent reasonable, serve grab-and-go food items
- Any concessions/restaurant seating is compliant with restaurant dine-in recommendations

### Low Risk
- Set an established window time for high-risk groups to come in without pressure from crowds and/or separate entrances and queues
- Limit the number of people in a confined area to enable adequate distancing at all times
- Maintain signage to remind and help individuals stand at least 6 feet apart when in common areas or while visiting exhibits (e.g. museums, zoos, aquariums, aviaries, botanical gardens)
- Congregating at any point is not allowed
- Encourage contactless payment; disinfect between transactions at facility stores/gift shops and comply with other retail recommendations
- Participants (e.g., players, performers, actors) in events should have their symptoms checked
- Electronic tickets and playbills encouraged in place of paper

**Concessions:**
- Serving and seating protocols consistent with restaurant guidance
- Maintain 6-foot distancing for all lines
- Encourage contactless payment
- To the extent reasonable, serve grab-and-go food items
- Any concessions/restaurant seating is compliant with restaurant dine-in recommendations

---

### Personal Services (including barbers, cosmetologists, body artists, nail technicians, tanning, etc.)

**Extreme limitations of this industry**
- Follow all employer guidelines outlined on page 7
- Business that rely on close human interaction are encouraged not to stay open
- Symptom checking in all interactions
- Face coverings worn by both service provider and client

**Industry open under strict hygiene protocols. Service provider and customer must wear face coverings.**
- Meticulous monitoring of symptoms
  - Follow all employer guidelines outlined on page 7
  - Both service provider and client wear face coverings
  - Symptom checking of all staff at the beginning of each shift, with a log that can be made available for inspection by health department
  - Customers must have their symptoms checked before services are rendered
  - Appointments scheduled with enough time allowed to disinfect all procedure surfaces between services

**Industry open with strict hygiene regimen and symptom monitoring**

#### High Risk

- Service provider maintains log of appointments with customer contact information to assist with contact tracing efforts
- When services are not being directly provided, 6 feet of physical distance must be maintained. This includes waiting areas and between clients at all times
- Contactless payment encouraged; financial equipment disinfected after each transaction

#### Moderate Risk

- Screen clients upon entering the facility with a questionnaire asking about symptoms, travel, and any sicknesses in the home
- Procedure/service area surfaces are disinfected between each client
- Appointments scheduled with enough time allowed to disinfect all procedure surfaces between services
- Service provider maintains log of appointments with customer contact information to assist with contact tracing efforts
- When services are not being directly provided, 6 feet of physical distance must be maintained. This includes in waiting areas and between clients at all times
- Contactless payment encouraged; financial equipment disinfected after each transaction

#### Low Risk

- Follow all employer guidelines outlined on page 7
- Same as high-risk column, except that employers do not need to actively monitor symptoms; employees self-report

#### New Normal Risk

- Follow all employer guidelines outlined on page 7
- Same as high-risk column, except that employers do not need to actively monitor symptoms; employees self-report
- Make cleaning supplies available throughout the establishment and post signs encouraging patrons to clean all equipment
### Day Care

### Hospital Settings and Ambulatory Surgical Facilities

Each hospital and ambulatory surgical center operating in Utah shall follow the protocols developed by the Utah Hospital Association in consultation with the Utah Department of Health, titled "Utah Hospital Roadmap for Resuming Elective Procedures 2.0".

### Non-hospital Setting, including Dentistry

Adhere to all protocols set forth in the following state public health order: [https://coronavirus-download.utah.gov/Health/state%20public%20health%20order.20.04.21.pdf](https://coronavirus-download.utah.gov/Health/state%20public%20health%20order.20.04.21.pdf)
General Guidelines for Employers

Best Practices for Employers

• Those who are, or work with, high-risk populations, should undergo daily screening/symptom monitoring, and be tested if they begin to experience COVID-19 symptoms. High-risk populations should take extra precautions to avoid close contact with multiple people
• Use online conferencing, email, or telephone in place of in-person meetings, even when people are in the same building
• Employees and customers should not congregate in groups; if your business involves a waiting area, customers should wait outside or in their cars
• Encourage contactless pay options if possible; otherwise immediately disinfect transaction equipment
• Make regular announcements to remind employees and customers to follow distancing guidelines. Use floor markings to mark appropriate physical distance where appropriate
• Encourage digital files rather than paper formats (e.g. documentation, invoices, inspections, forms, agendas)
• Consider what reserve supplies may be necessary to obtain (e.g., cleaning supplies, gloves or other protective equipment)
• Consider the possibility of interruptions to water or power that might force closure
• Establish and maintain open dialogue with local communities, including key vendors and suppliers, exploring contingencies and sharing appropriate decisions about foodservice, transportation, and other services
• Identify a workplace coordinator who will be responsible for COVID-19 issues and their impact in the workplace
• If relevant, update emergency communication plan with key contacts and backups, chain of communications, and processes for tracking and communicating; share the response plan with employees and communicate expectations
• Ensure every employee’s contact information and emergency contact details are up to date; ensure a plan is in place to reach employees quickly
• Educate workforce about the threat of the COVID-19 pandemic, what the business is doing, and what they should do to protect themselves and their families
• Prepare for absenteeism—not only sick employees will stay home; others may need to care for the sick or children if schools close; those employees should notify their supervisors
• Provide signage at each public entrance to inform all employees and customers that they should:
  o Avoid entering if they have a fever of 100.4 degrees Fahrenheit or above, cough, trouble breathing, sore throat, muscle aches and pains, sudden changes in smell or taste, or feel generally unwell
  o Maintain a minimum 6-foot distance
  o Sneeze/cough into cloth, tissue, elbow or sleeve (not hands)
  o Avoid hand shaking or unnecessary physical contact
  o Wash hands often, and for at least 20 seconds
  o Wear face coverings

Cleaning & Hygiene Guidelines for Employers

• Promote etiquette for coughing, sneezing, and handwashing; avoid touching face, especially eyes, nose, and mouth; place posters that encourage hand and respiratory hygiene
• Face coverings should be worn by employees and patrons, especially when difficult or impossible to maintain 6-foot distance
• Ensure adequate air circulation and post tips on how to stop the spread of germs
• When possible, discourage sharing of work tools and equipment
• Make a list of high-touch surfaces requiring routine disinfecting and perform routine environmental cleaning (e.g., elevator buttons, workstations, countertops, handrails, doorknobs, breakrooms, bathrooms, common areas), either twice a day or after each use. Keep a logbook of cleaning regimen. Those cleaning should:
  o Wear gloves
  o Prior to disinfecting, clean surfaces with soap and water if soiled
  o Use EPA-approved disinfectant, industrial cleaner, diluted bleach, or alcohol solutions
• Provide disposable disinfecting wipes for employee use on high-touch surfaces; provide no-touch trash bins
• Laundry: wear gloves, use warmest appropriate water setting, dry items completely, do not shake dirty laundry, launder items that have come in contact with COVID-19 separately
• Make hand sanitizer, soap and water, or effective disinfectant readily available. Provide pop-up handwashing stations or facilities where necessary (e.g. open houses, construction sites)
• Personal Protection Equipment (PPE) should not be shared and should be disposed of properly
• After using gloves, employees should wash their hands

Employers Monitoring Symptoms

• Employees who are sick or who appear to have COVID-19 symptoms should be separated from other employees/customers immediately and sent home; immediately clean and disinfect areas the sick employee visited
• Train managers/leadership to spot symptoms of COVID-19 and to be clear on relevant protocols
• Monitor employee symptoms, especially fever (100.4 degrees Fahrenheit/38 degrees Celsius, or above). If employees take simple medications such as acetaminophen, ibuprofen, or aspirin, they should take temperature beforehand
• Do not allow employees to come to work if they feel sick; create or maintain non-punitive leave policies so employees do not feel pressured to come to work if they are sick. Remind employees to report any illness to a manager, especially if sick with fever, cough, trouble breathing, sore throat, muscle aches and pains, sudden changes in smell or taste
• If an employee is confirmed COVID-19 positive, employers should inform close contact employees while maintaining confidentiality; close contact employees should self-monitor for symptoms for 14 days

---

9 Symptoms include fever of 100.4 degrees Fahrenheit or above, cough, trouble breathing, sore throat, sudden change in taste or smell, muscle aches or pains
Appendix: Guidelines for Dine-in Restaurants Open in Orange & Yellow

Operational Practice

- Limit tables to groups of 10, preferably members of the same household
- Groups of patrons at a table must maintain a distance of 6 feet from patrons of other parties at all times. Either move tables or mark off tables not to be used
- In waiting areas, a 6-foot distance must be maintained between parties, whether indoor or outdoor
- Maintain signage to remind individuals from separate parties to stand at least 6 feet apart; waiting area has floor markers to indicate proper spacing
- Hosts preferably open doors for customers and guide them to their seats to prevent traffic or congregating; hand sanitizer available at door
- Recommendation that upon entry, hosts point guests to signage that includes the following information:
  o Outlines symptoms\(^{10}\) and encourages that if the patron, or someone they live with, has experienced COVID-19 symptoms, to please order takeout instead
  o Recommendation for high-risk individuals\(^{11}\) to order takeout/delivery instead of dining in for the protection of that individual
- Manager checks each employee for symptoms before every shift with temperatures taken, preferably for employees of the same household
  - Hand sanitizer must be available immediately adjacent to bathrooms
  - Close restaurant for cleaning and disinfecting in the morning, afternoon, and evening. Cleaning and disinfecting includes all tables, chairs, door handles, floors, bathrooms, and any high-touch surfaces
  - Buffet and self-serve restaurants will provide utensils, cups, plates and other service items only from the counter where food is ordered. None of these items will be accessible to the public. Buffet style restaurants will provide servers who will serve the meals from buffet to limit exposure. Patrons will not be allowed within 6 feet of the food serving area
  - Stagger workstations so employees are not facing one another and are 6 feet apart
  - To-go boxes, pizza boxes, paper cups, and any other paper product that touches food must be treated as food
  - Staff must use gloves when handling ready-to-eat foods (including ice). Gloves are not required when handling foods that have yet to be cooked
  - Indoor playrooms in restaurants remain closed

\(^{10}\) Symptoms include fever of 100.4 degrees Fahrenheit or above, cough, trouble breathing, sore throat, sudden change in taste or smell, muscle aches or pains

\(^{11}\) High-risk individuals are defined as people 65 years and older, people who live in a nursing home or long-term care facility, people of all ages with underlying medical conditions, including lung disease or moderate to severe asthma, people who have serious heart conditions, people who are immunocompromised (many conditions can cause a person to be immunocompromised, including cancer treatment, smoking, bone marrow or organ transplantation, immune deficiencies, poorly controlled HIV or AIDS, and prolonged use of corticosteroids and other immune weakening medications), people with severe obesity, diabetes, chronic kidney disease undergoing dialysis, or liver disease
